

AMENDMENTS TO THE SPECIFICATION

Please replace the title of the invention with the following amended title:

HOUSING FOR A LIQUID SEAL VACUUM AND PRESSURE RELIEF VALVE

APPARATUS

Please replace paragraph [0028] with the following amended paragraph:

[0028] Other functions are also possible. For example, the fuel vapor pressure management apparatus 20 can be used as a vacuum regulator, and in connection with the operation of the purge valve 16 and an algorithm, can perform large leak detection on the fuel system 10. Such large leak detection could be used to evaluate situations such as when a refueling cap 12a is not replaced on the fuel tank 12. The fuel pressure management apparatus 20 and purge valve 16 communicate with an automotive on-board diagnostic (OBDII) engine computer 82.
